

# Boilers

High efficiency low emission solutions for hot water generation.

Boilers : Fire Tube, Condensing and Electric

Burners : Compatible for oil, gas and alternative fuels

Controls : Compatible for all types of communications protocols

Heat Recovery: For better efficiency and sustainability

Gas and Oil fired boilers designed to ensure the utmost: power efficiency, quietness, safety and durability.

Compact type boilers provides a new generation of heating with the possibility of variable temperature operation.

## **Features:**

- Gas or diesel heating operation;
- Complete with forced draught burner;
- Boiler and burner perfectly integrated for power and operation in total safety;
- Very thick steel shell;
- Pressurized furnace with flame reversal;
- Cylindrical flue pipes equipped with special turbulators;
- Complete with control panel (depending on type of operation);
- Prewired control panel and burner;
- High thermal insulation;
- Stylish casing;
- High seasonal efficiency
